

# PRODUCT DATA

## CHEMICAL DOSING TANKS AND BUNDS

Specially designed tanks for the water treatment and purification industry.

Suitable for use with an extensive range of chemicals (specific compatibility information available on request).

One-piece moulding with smooth internal and external surfaces.

Manufactured in U.V. stabilized linear M.F.P.

Split level top design gives extra strength and provides an area for mounting equipment e.g. agitators, pumps etc.

Supplied complete with screw caps for safety.

Manufactured under an ISO 9002 quality management system.

A range of purpose made bunds are available to take 100% of the relevant dosing tank capacity.

Bunds are designed to be stackable for efficient transportation and storage.

Dosing tanks are available in a standard natural colour with the bunds being supplied as standard in blue. (Other colours can be supplied subject to quantities).

### Dosing Tanks – Technical Specifications

Ref:	Dimensions (dia x height)		Nom Capacity		Cap Size mm (dia)	Aperture mm (dia)	Weight	
	mm	inches	ltrs	gal			kgs	lbs
<b>DT50</b>	425 x 500	17 x 20	50	11	190	130	3.5	7.7
<b>DT100</b>	495 x 700	19.8 x 28	100	22	190	130	7.5	16.5
<b>DT200</b>	635 x 785	25.4 x 31.1	200	44	190	130	11	24.2
<b>DT 300</b>	660 x 1075	26.4 x 43	300	66	190	130	16.5	36.3
<b>DT 500</b>	815 x 1100	32.6 x 44	500	110	270	195	21	46.2
<b>DT 1000</b>	1065 x 1355	42.6 x 54.2	1000	220	270	195	35	77

Larger dosing requirements available upon request.
