

## PRODUCT DATA HA62

### Product Uses

HA62 is a fast acting non-foaming, non-tainting biocide, which is based on Hydrogen Peroxide. As a result, the decomposition products are completely safe and HA62 will break down into water and oxygen.

HA62 is effective against a wide spectrum of micro organisms including Viruses, Aerobic and Anaerobic Bacteria, Bacterial Spores, Mould Yeasts, Fungi and Algae.

### Product Application and Uses

The quantity of HA62 required will vary according to system conditions and is affected by time and the level of organic fouling.

HA62 can be injected directly from the drum or from a dosing tank using a dosing pump for cooling systems and shot dosed (using a dosing pump or dosing pot) for other water systems.

Wherever possible, HA33 should be dosed automatically.

HA62 is compatible with other products to form part of a water treatment programme to comply with the HSC Approved Code of Practice & Guidance – The control of legionella bacteria in water systems.

### General Specification

Colour:	Pale yellow	pH:	10 – 11
Odour:	Perceptible odour	Form:	Liquid
S.G. at 20°C:	1.09 – 1.12		

### Packaging, Storage & Handling

HA62 undiluted is a powerful oxidising agent. Store so as to avoid contact with combustible materials, acids, alkalis, reducing & oxidizing agents, frost and excessive heat.

HA62 is delivered in 25 kg or 210 kg drums and should be stored in a dry area.

HA62 is classified as an irritant, so avoid contact by wearing suitable protective clothing, gloves and eye goggles in accordance with the relevant BS EN standards. **HA62/pdi/10/04/09**
